

AQUALUMA[®]
LED LIGHTING

AQUA DUO 9X

**POWER ABOVE ITS CLASS.
PERFORMANCE BELOW THE SURFACE.**

The Aqua Duo 9X is a factory-paired, high-performance underwater LED lighting system designed to dominate in clarity, beam width, and output intensity. Each unit packs 9 high-powered LEDs, delivering a wide, penetrating flood of light beneath the waterline. It sets the scene with vivid ambience and powerful glow, enhancing the boat's presence and attracting fish below.

With a dedicated external driver, the system keeps critical electronics inside the vessel dry, protected, and high-performing. The Duo 9X is serviceable in-hull, built around Aqualuma's proven 60mm polymer housing, and available in Ultra Blue or Brilliant White.

Whether you're outfitting a runabout or a serious fishing machine, the Aqua Duo 9X delivers unmatched output in a sleek twin-beam configuration. Sold exclusively as a pair.

TECHNICAL SPECIFICATIONS

GEN 4 LED TECHNOLOGY:

Advanced lighting performance.

WARRANTY:

3 years on internals, 10 years on housing.

HOUSING:

Patented, high-tech, chemically resistant polymer.

LENS:

No seals to deteriorate or leak.

SERVICEABILITY:

Fully serviceable and upgradeable from inside the vessel.
